MAXIMO READINESS SCORECARD

Lets Score Your Maximo Environment

How to use this scorecard:

Grab a pencil and total up your organization's score from **0–2**

2 = Clearly defined, consistently applied
1 = Partially defined or inconsistent
0 = Not in place / unclear

1. Strategy & Business Alignment

Question Score (0–2)

1. We have a shared, executive-approved definition of **asset criticality**
2. Maximo priorities are directly tied to **risk, revenue, safety, or compliance**
3. KPIs are clearly linked to **decisions and accountability**

Section Max: 6

2. Work & Reliability Execution

Question Score (0–2)

1. We can accurately measure **planned vs. unplanned work**
2. Job plans and PM templates are **standardized across sites**
3. Failure coding is **required, consistent, and used**
4. We can identify **top recurring failures by asset class**

Section Max: 8

3. Data, Integration & Governance

Question Score (0–2)

1. Inventory strategy supports **reliability objectives**
2. Maximo is integrated with **ERP and operational systems**
3. Data governance ownership is **business-led (not just IT)**

Section Max: 6

Your Total Score: _____ / 20

Score Interpretation

- **16–20 | Performance-Driven**
  Maximo is functioning as a strategic platform. Focus on optimization and advanced analytics.
- **10–15 | Operationally Capable**
  Solid foundation, but inconsistencies are limiting scale and executive value.
- **0–9 | Transactional**
  Maximo is capturing activity, not driving decisions. The modernization opportunity is significant.

Maximo Readiness Scorecard

Is your Maximo environment maximizing performance or merely processing transactions? The Maximo Readiness Scorecard provides a structured approach to assess your organization's alignment with strategic goals, work execution reliability, and data governance. Discover how to elevate your asset management system from capturing activity to driving impactful decisions and optimizing performance.
